DISTINCTIVE ECONOMICALLY DESIGNED HOMES

As you have sent for this plan book, obviously you are contemplating building a new home. You have probably been thinking about it for quite some time, but because you had too little knowledge of how to go about it, or because you were afraid of costs, you kept putting it off. We can help you, and offer the following suggestions as a guide:

The building plans illustrated throughout this HOME PLANNING BOOK are created at the Building Centre, by our staff designers, who are fully experienced and qualified in the requirements of both N.H.A. and V.L.A. specifications to plan and design economically.

It has been our pleasure to supply many hundreds of home owners and contractors with plans and custom designs. In this edition we have presented varied illustrations of all types of homes taken from our wide selection of practical, economical designs, with many more at the Centre from which to make a selection.

FROM THESE, AND MANY OF OUR OTHER DESIGNS, some fine homes have been built in Greater Vancouver and throughout British Columbia as well as the Prairie Provinces. Discriminating home builders find our plans tailored to suit their individual needs. Minor changes may be required to suit the locality or building site, and the Building Centre Planning Department is always pleased to assist and advise on the merits of suggested changes.

SELECTING YOUR HOME SITE

Before purchasing your building lot, there are many important facts to keep in mind. Check the transportation facilities, accessibility to schools, churches, places of recreation, shopping areas, municipal services available, gas, electricity, phones, sewers, building restrictions, taxes, etc. Do not buy too small a lot, or one because it appears to be a bargain. Always purchase subject to N.H.A. or mortgage company approval. A small lot may limit the type or design of your home, which may eventually result in your having to sell. Be sure the type of home you build is one that other people would like to own. This makes for better resale value.

We have a complete Stock Plan Service and Planning Department for your convenience. May we suggest that you discuss your ideas with our designers, or if you live out of town, we will be pleased to help you with your plans by mail. We require only a sketch of the floor plan — along with room sizes — to convey your requirements to our designers.

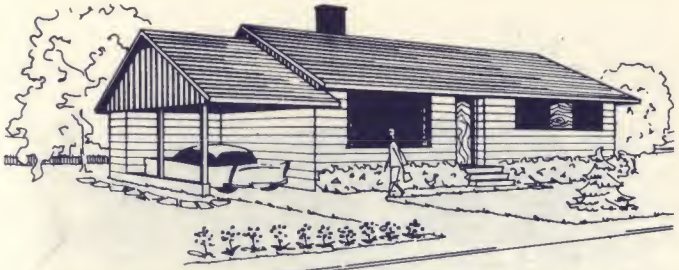

To save you steps and time, The Building Centre has free literature on most products used in the home. We invite you to make use of this service.

WE WILL FORWARD PLANS UPON RECEIPT OF MONEY ORDER THROUGH THE MAIL, OR BY C.O.D. IN BRITISH COLUMBIA PLEASE INCLUDE S.S. & M.A. TAX.

CALGARY · EDMONTON · VANCOUVER

Head Office: 1026—16th Avenue S.W., Calgary, Alberta

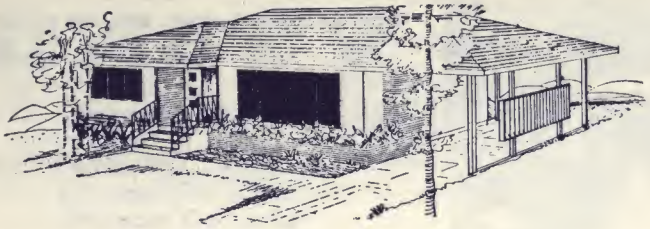

YTONG — light in weight, easy to handle, works like wood — effects considerable savings with simplified construction. Only three operations needed to complete single-unit wall.
C.M.H.C. approval means YTONG is available for NHA-financed homes. Exterior walls of 8" YTONG blocks require no further insulation — stucco and plaster can be applied direct to YTONG surface.

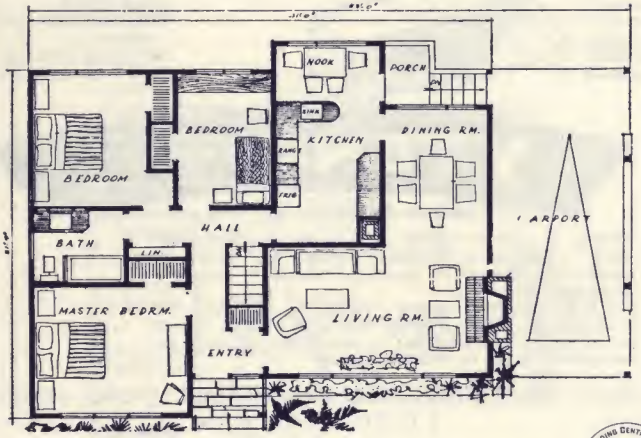

IDEAL FOR WESTERN CANADIAN CLIMATE, YTONG FEATURES 5 COST-CUTTING POINTS:

• **High Insulation** • **Light Weight** • **High Compressive Strength** • **High Fire Resistance** • **High Sound Resistance**

Consider the many advantages of

AUTOMATIC GAS HEATING

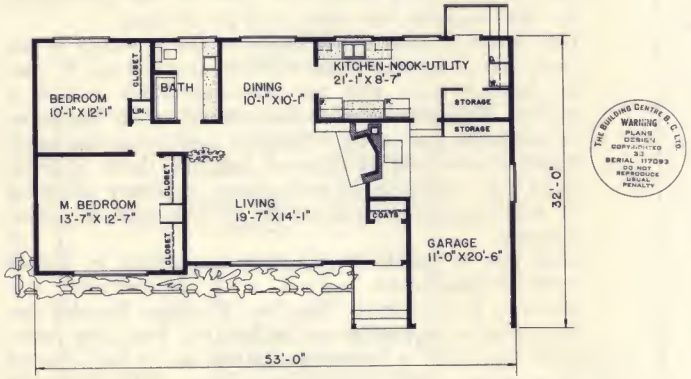

There are many advantages to heating your new home with Natural Gas.
Gas is completely automatic. You set the thermostat for the warmth you want, and get it fast!
Gas is economical. An example of the economy is the fact that a typical home of 1000 to 1200 sq. ft. can be heated with gas for approximately $12.50 a month. This amount can be reduced when the home is insulated and when other gas appliances are used.
Further economy is enjoyed because there is little need for servicing of equipment, chimney cleaning is eliminated, and no space is required for fuel storage.
And gas is quiet – especially important in homes without basements.
Ask the B.C. Electric Heating Advisory Service for an accurate cost estimate for heating your new home with gas, and a recommendation as to the size of furnace required. Enquire too, about B.C. Electric's Budget Billing Plan that lets you spread your heating costs over most of the year.

WHY SHELL FURNACE OIL IS BEST FOR YOUR BURNER

Shell Furnace Oil costs no more than ordinary oils, yet it offers *complete* protection for your heating system in *two* money-saving ways.

YOU SAVE ON MAINTENANCE CALLS

Only Shell Furnace Oil gives you the benefit of a special additive that keeps your burner filter *spotlessly* clean. It banishes the top cause of burner breakdown . . . keeps your burner at *peak* efficiency—all winter long.

PROTECTION AGAINST STORAGE TANK LEAKS

With Shell Furnace Oil you get Sonitor protection. Sonitor . . . stops rust forming. Can actually make your storage tank last twice as long.
